In re Continuation Application of Parent Case :  
Parent Case :  
Peter W. Hamilton et al. :  
Serial No. 09/758,753 : Group Art Unit 1732  
Filed January 11, 2001 : Examiner: L. Tentoni  
For High Speed Embossing and Adhesive :  
Printing Process and Apparatus

PRELIMINARY RESPONSE

Assistant Commissioner for Patents  
Washington, D.C. 20231

Dear Sir:

The Continuation Application of the above identified application, submitted herewith claims embodiments of the high speed embossing and printing process, which are disclosed in the combination of the parent application and U.S. Patent No. 5,871,607, incorporated by reference in the parent application at page 1, lines 18-19. This Continuation Application specifically claims embodiments of the high speed processes comprising the step of applying a renewable release agent to the outer surface of the first embossing roll so that the substance will be preferentially attracted to the material web. Antecedant basis for this embodiment is found in the incorporated Patent 5,871, 607 at Col. 10, Line 56-61 and Figure 5. Applicant's point out that the reference numerals from the incorporated patent have been corrected to be consistent with the numerals of the parent application.

Respectfully submitted,

  
Stephen T. Murphy  
Agent for Applicants
